

Ensamble Studio

BROOKLINE, MASSACHUSETTS, AND MADRID, SPAIN

From an experimental residence built in the caverns of a stone quarry (*AD*, April 2021) to permanent art installations that appear to have been excavated from the earth, the work of husband-and-wife architects **Antón García-Abril** and **Débora Mesa** interrogate the very ways we live and build. That inquiry now continues from their own Brookline, Massachusetts, home and studio, assembled out of prefabricated elements, and extends to Spain, where the studio's new factory outside Madrid produces more modules for projects to come—among them a follow-up to their blockbuster interventions at Tippet Rise Art Center in Montana. ensamble.info

Ensamble Studio principals Antón García-Abril and Débora Mesa at their Ca'n Terra project in Menorca, Spain.
